PERSONAL EXPERIENCE

I am a motivated, young graduate student from Vaasa UAS and currently looking for a job at my respective field. The first programming language I learned was C program when I was in college and since then I love programming and analogical problem solving, which is why I chose this field of study. My knowledge for programming is growing and continuing to grow. I aspire to be a wonderful programmer who might be able to make a difference through all those 1's and 0's inside the computer. I have gained lots of experience in different fields throughout my whole life and I believe these experiences will empower me to go forward in any work field I am interested in. I am also open for any experience I can gather from a work field because human have only one life to live.

EXPERIENCE

2021

PROJECT TRAINING, MUOVA Oy

I have been working as a 3D model designer and texture render. I used "Blender" to do most of the 3D modelling. I also used UNITY to develop a VR platform for the company. The total timespan for working here is 3 months.

2020

INTERNSHIP, MY LANGUAGE SKILLS S.L.U.

I had my first internship which was conducted remotely. My main task was to develop WordPress plugins. I had to use intensive PHP programming language and a lot of JavaScript and CSS. It was for 4 months.

2020

INTERNSHIP, WebAula Oy

I worked in this company for my remaining 1-month internship and the experience was wonderful. The company is in Vaasa and my main task was developing website through WordPress. I worked with Elementor and a lot of CSS!

2016 – 2017

PRESIDENT, FILM PICKETERS

This has been the most outstanding experience of my life. I was honoured with the president position for a film production company called Film Picketers. From this production house I have gathered experience of how to handle difficult situation and hard decision making. The production house is still running and is situated in Bangladesh.

EDUCATION

2017-2021

INFORMATION TECHNOLOGY, VAASA UNIVERSITY OF APPLIED SCIENCE

I am a graduate student majoring in Software.

2016-2017

TELEVISION AND FILM, UNIVERSITY OF DHAKA

Situated in the capital of Bangladesh, University of Dhaka is the oldest and most prestigious university in Bangladesh. I studied 3 semesters in this university and learned technical skills like video editing, animation and other video making related skills.

SKILLS

I have lots of skills which can be useful to your company, but I would like to show my IT skills:

- **Game Development**- UNITY
- **3D Design and Simulation**- AutoCAD, Blender
- **Editing and Animation**- Adobe Premiere pro, Adobe After effect, Adobe Flash/animator
- **Front end Development**- React.JS, HTML, CSS, Json
- **Blockchain**- Marlowe Playground, Solidity
- **WordPress**- Template dev, Plugin Dev, Plain Website
- **Programming language**- C#, C, Java, JavaScript, C++, Solidity (ETH blockchain)
- **Office software**- Microsoft excel, word, PowerPoint
- **Graphic Design**- Adobe Photoshop, Illustrator
- **Others**- GitHub, Linux OS

ACTIVITIES

NASA space app Challenge 2019- Earned the “VAMK Special Mention” award for the Challenge “The art side of the moon”

Wärtsilä STHC 2019- Won the “Best Utilization of Ecosystem” for developing a concept of an AI technology for ship’s maintenance and efficiency.

LANGUAGES

- Bangla- Native language.
- English- Second language. Good speaker
- Finnish- Beginner. Learning constantly.
